

"The Everything Oil"

Ozonated olive oil dates back to inventor Nikola Tesla in the early 1900s!

Olive oil in particular possesses properties known to be *effective for skin lesions*, with the ability to *reduce the activity of viruses, bacteria, yeasts, and fungi*.

Contains certain properties to aid in *stimulating tissue growth* and *revitalizing epithelial tissue*.

Deeply *moisturizing, nourishing* and *repairs skin*.

Other beneficial results include:
a decrease in inflammation,
increased collagen production,
smoother skin, and increased
oxygen tension in wounds.

OZONE OIL

Ozone Organic Oil

Ozonated organic oil is a natural cosmetic with **reparative, purifying and antioxidant properties**, which *deeply moisturizes and nourishes the skin* at the same time as *protecting it* from external damage. Because of its natural origin, ozone oil is well-tolerated by the majority of people, which makes it appropriate for all ages.

Oil Uses

Ozone oil is appropriate for treating damaged skin:

- Hemorrhoids, intimate feminine care
- Athlete's foot
- Problems with blood circulation and dryness in the legs (women, men, & elderly)
- Insect bites, stings

Topical use: Dermatologist tested. Suitable for sensitive skin. Does not contain parabens, phthalates, phenoxyethanol, colorants or fragrances. Not tested on animals.

Ozone's main feature is its incredible ability to *purify*, eliminating organic compounds including bacteria, fungi and viruses. When applied directly onto them, ozone has an **immediate effect** and the only residue that it leaves behind is pure oxygen. This makes it an extremely effective natural germicide agent. In the case of ozonated oils, the ozone reacts with the fatty acids in the oil under controlled reaction conditions, creating a **positive environment for healing**.

Nourish your skin

Your body absorbs up to 60% of what you put on your skin right into your bloodstream. With our pure ozonated oil products, you'll notice the difference in immediate therapeutic relief as well as quality of your skin's look and feel over time.
