

# IV Therapy Menu

---

## Immune Support

---

### Vitamin C

*Promotes healing & collagen synthesis while boosting your immune system. Decreases inflammation & aids in treating conditions.  
\*also available as an addition to other IV bags*

### Myers' +

*Provides multiple vitamins, trace minerals & amino acids. Great for cellular rejuvenation & overall boost in energy.*

### Immune Pro

*A blend of immune supporting vitamins and minerals. This is a great way to give your immune system a boost.*

### MAH (Major Auto-Hemotherapy)

*Help the body's natural immune system heal itself. Superior treatment to help decrease inflammation, viral & bacterial loads. A series of infusions is recommended for best results.*

## Mental Health

---

### Procaine

*Reset for the central nervous system. Relief of symptoms associated with anxiety, depression & pain.  
\*also available as an addition to other IV bags*

### Thiamine

*Central nervous system reset. Plays a role in mood support by relieving symptoms associated with anxiety, depression, as well as replenishing B1 levels.*

## Detoxification

---

### Glutathione

*Rich, powerful antioxidant that provides liver support & improves skin tone and texture. Can provide a boost for overall health and wellness.  
\*also available as an addition to other IV bags*

### Chelation

*Lift the burden of heavy metal toxicity in your body. Helps relieve symptoms associated with elevated cholesterol levels. Infusion includes EDTA and B vitamins.*

*\*Myers' + after Chelation is recommended*

## Other

---

### Magnesium

*Magnesium is an essential mineral necessary for many healthy functions of the body. From relaxing and calming muscles and nerves to supporting healthy immune system function, IV magnesium is a great option. Magnesium can also help regulate metabolism and assist in maintaining blood sugar levels.*

### Hydration

*Provides multiple health benefits to all systems in the body. Improves overall health & wellbeing.*

### PTC (Phosphatidylcholine)

*Anti-aging factors to help improve cell integrity & the transport of nutrients while exporting toxins across the cell membrane. A series of infusions is recommended for best results.*

# Hyperbaric Oxygen Therapy

---

## AMENITIES

---

### Cool Flow Airconditioning

*Provides temperature and humidity control by cooling and dehumidifying, or heating the hyperbaric chamber environment.*

### Charging USB Port

*Connect any device to enhance and enjoy your therapy.*

### 2-Way Communication

*The 2-Way Communication System can be operated during any type of treatment and makes communication between the person inside the chamber and the operator possible.*

### Rainbow Chakra Mattress

*Produces pulsed electromagnetic fields around the body. This field delivers healing energy to the body & also produces negative ions and far infrared waves*

### Oxygen Mask

*Professional oxygen mask is the perfect combination of performance, durability and comfort. Fully adjusted to allow easy breathing the mask comes with a comfortable oral nasal and a supportive head strap.*

### Air Silencers

*Reduce noise levels inside and outside the chamber making the treatment more comfortable.*

### 2 Person Modality

*These chambers can comfortably fit 2 people at once. You and a loved one can enjoy dual treatments.*

## ABOUT HBOT

---

**Mild Hyperbaric Oxygen Therapy (mHBOT)** is a non-invasive treatment that utilizes pressurized oxygen inside a comfortable chamber. These chambers can **heighten the efficiency of your own body's natural processes** by pressurizing the atmospheric oxygen into your body (this opens the same pathways triggered during oxidative stress) and *allows the body to absorb more oxygen than would normally be possible.* This extra **oxygen infuses into the blood, plasma, cells, and tissues, optimizing their healing ability.** *Your cells then can achieve better function to help with the reparative process, increasing the natural healing and recovery process.*

Oxygen is breathed in and transported to the tissues by red blood cells. It can be seen as the **most essential source of energy for an optimal physical and mental health**, supplied through our arteries. However, as we age, the arteries become narrower, *making it harder for oxygen saturated blood to reach all tissues.* The increased oxygen and stem cells available in the hyperbaric chamber **leads to improved brain and body performance.**

## LIGHT THERAPY

---

Light Therapy device emits a one-of-a-kind combination of three beneficial light sources – Red, Green, and Blue Light – for overwhelmingly positive results for skin and general health.
