

Hear from some of our patients

"I began to notice physiological changes to my vagina. I was very unhappy with the continued discomfort. Now that I have received my first FemiLift procedure, I feel the discomfort is reduced. There was minimal pain and almost no downtime. I am thrilled. //

HN, Age 45

"My body changed considerably after having four children. I lacked self confidence for several years but now with FemiLift my outlook on life is completely different. //

EL, AGE 53

"When I was diagnosed with breast cancer at 42, I was put on several medications. I immediately began to notice severe side effects including vaginal health. I approached my practitioner and she recommended FemiLift. After completing the recommended three procedures, my vaginal discomfort literally disappeared. FemiLift has been life changing for me. //

RT, AGE 47

Millions of women suffer from vaginal irregularities and structural changes due to childbirth, age or a variety of other reasons that diminish their confidence and self-esteem. Knowingly or unknowingly, this may put a strain on marital relations. Embarrassed, frustrated, and sad, they are often too uncomfortable to speak up.

Introducing FemiLift: Clinical solutions for feminine health

FemiLift is a breakthrough technology using an Alma CO₂ laser to deliver fractionated light and thermal energy to assist in vaginal mucosa revitalization. Alma Lasers which manufactures the technology is the worldwide leader of aesthetic and surgical laser technologies.

The procedure is performed by inserting a probe into the vagina with a 360-degree rotation capability. It is a virtually painless procedure without surgery, anesthesia, or downtime.

Simple and safe: Single use hygienic sheath

What is The Condition?

Over time, the structure of the vagina can change due to age and childbirth leading to a variety of symptoms including pain, itching, and heaviness.

These Vaginal Irregularities can **lead to:**

- Diminished vaginal health
- Vaginal conditions that affect one's lifestyle

FemiLift is:

An in office aesthetic procedure without anesthesia or surgery. It is a fast, 10-15 minute procedure with little to no downtime and minimal side effects.

How do I Know if I qualify for the procedure?

- Step 1** Schedule a private consultation with your practitioner.
- Step 2** Your practitioner will review your medical history.
- Step 3** Your practitioner will do a routine gynecological exam, which may include a Pap smear.
- Step 4** Your practitioner will advise you if you qualify for the procedure.
- Step 5** If you do qualify, your practitioner will schedule you for a minimum of one procedure every four weeks, for a total of three procedures.
