

Endo Panel

Accomplish your health & life goals with the Endo Panel

ENDO BIOGENY

A potent tool that helps us identify and treat chronic illness and diseases that often go unnoticed by typical and routine tests. Improve your overall health and well-being.

DO YOU?

- Have Health Issues that Seem Undiagnosable?
- Struggle to Control Known Medical Conditions?
- Have a Family History of Illness or Disease You Want to Avoid?
- Feel Healthy and Want to Stay Healthy?

If you answer "Yes" to any of these questions, ask your provider at The Healing Sanctuary to learn more about the Endo Panel Today!

WHAT IS AN ENDO PANEL?

An Endo (Endobiogeny) Panel is a set of indexes that are derived from some pretty standard blood work. Unlike regular blood work, that only tells us what is in your bloodstream at the time the blood was drawn, the Endo Panel gives us an idea of what is going on inside your body at the tissue, cellular, and metabolic levels.

Results from this panel include but are not limited to all four hormonal pathways including adrenal, neuroendocrine, sex, and pituitary hormones. Also included in the panel results are your free radical levels, carcinogenic marker levels, and diabetes markers.

WHY SHOULD I DO AN ENDO PANEL?

Mysterious Health Issue

There are many conditions that can be caused by a variety of underlying imbalances, that cannot be identified through conventional medicine. Some common conditions that are often unsolved puzzles in conventional medicine include:

- Diffuse Muscle Pains
- Abdominal Pain
- Chronic Diarrhea
- Chronic Fatigue
- Weight Gain
- Headaches
- Infertility
- Memory Disturbance
- Irregular Menstrual Cycles
- PreMenstrual Complaints
- Weight Gain
- Headaches
- Chronic Sinus Conditions
- Digestive Problems
- Lack of Sex Drive

Prevention

If you have a family history of degenerative diseases such as Alzheimer's Disease, Multiple Sclerosis (MS), or Cardiovascular Disease, an Endobiogeny Panel can give you an idea of your predisposition to these problems, and can help target imbalances that can be corrected to reduce your risk of developing these diseases.

WHAT SHOULD I DO AFTER COMPLETING THE ENDO PANEL?

Minor imbalances identified by your endo panel can usually be corrected with lifestyle and dietary changes, with support from nutritional supplements and herbs when appropriate. Large issues identified by the panel may require additional care. After reviewing your endo panel with you, one of our providers will recommend what a treatment plan.

WILL INSURANCE COVER THE ENDO PANEL?

Any labs and office visits associated with the panel will be billed to insurance. The endo panel includes special software tools used to analyze data and lab results that cannot be billed to your insurance. As a result, only certain portions of the Endo Panel will be billed to insurance. If you have questions on out-of-pocket costs, please contact our billing dept.

Cancer or Pre-Cancer

A number of physiological imbalances create a fertile ground for cancer growth. An Endo Panel can give you an indication of imbalances that should be addressed to support your body's ability to clear cancerous cells.

Known Medical Conditions

Diagnosed with a common medical condition, like hypertension or diabetes? Would you like to get to the underlying root cause of the issue rather than simply counteract your body's misbehavior with prescriptions? The Endo Panel can direct you to the underlying cause, leading to a specific therapeutic treatment.

General Wellness

If you are feeling well and want to stay that way throughout a long and happy life, the Endo Panel will help identify minor imbalances before they express themselves through symptoms or disease.

Mental Health

If you are dealing with depression, insomnia, OCD, anxiety, or other mental health issues, the Endo Panel, unlike most labs, gives helpful insight to these conditions.
