

# The Healing Sanctuary

## IV Therapy

### IV THERAPIES

#### Advanced Myer's Cocktail (Basic)

Provides multiple vitamins, trace minerals & amino acids. Great for cellular rejuvenation & overall boost in energy.

#### MAH (Major Auto Hemotherapy)

Help the body's natural immune system heal itself. Superior treatment to help decrease inflammation, decrease viral & bacterial load. A series of infusions is recommended for best results.

#### Vitamin C

Promote healing & collagen synthesis while boosting your immune system. Decreases inflammation & aids in treating conditions ranging from a common cold to cancer.

#### Glutathione

Rich, powerful antioxidant. Provides liver support & improves skin tone and texture. Reduces insulin resistance & prevents cell damage. A series of infusions is recommended for best results.

#### Healing Tissue (Pre/Post Surgical)

Aids in tissue preparation prior to surgery & promotes healing after surgery. Essential minerals including taurine & procaine provide pain relief & reduce inflammation.

#### Procaine

Reset for the central nervous system. Relief of symptoms associated with anxiety, depression & pain.

#### Chelation

Lift the burden of heavy metal toxicity in your body. Helps relieve symptoms associated with elevated cholesterol levels. Infusion includes EDTA and B vitamins; gentle chelation options available.

#### Baker's Blend

Thyroid & hormone support. High mineral content supports eyes & heart tissue. Provides energy boost, aids in lowering blood pressure & soothes the nervous system.

#### Phosphatidylcholine (PTC)

Anti-aging properties. PTC helps improve cell integrity & serves to improve the transport of nutrients & export toxins across the cell membrane. A series of infusions is recommended for best results.

#### Hydration

Provides multiple health benefits to all systems in the body. Improves overall health & wellbeing.

#### Poly-PlusMVA (Multivitamin and Amino Acid)

Increases energy, reduces fatigue & enhances overall health. Provides additional boost for those with autoimmune diseases & in chemotherapy, or radiation treatments. A series of infusions is recommended for best results.

Ask your provider which option is best for you.

### IV PUSH OPTIONS

#### Glutathione Push

Rich, powerful antioxidant. Provides liver support, improves skin tone & texture. Can provide a boost for overall health & wellness.

#### Vitamin C Push

Great way to boost your immune system & prevent illness. Powerful antioxidant that keeps the immune system functioning properly.
