L-lysine

An essential amino acid. The human body cannot make lysine, so it must be eaten in the diet.

Houseleek Leaf (*Sempervivum tectorum*)

This is a common succulent used much like aloe and is used as a treatment of burns, potential ear infections, digestive aid, and immune booster.

Knotweed Root (*Polygonum cuspidatum*)

An edible plant that is thought to boost the body's innate immune system as well as target spirochete infections.

Black Currant Leaf (*Ribes nigrum*)

This herb is thought to boost the immune system, reduce inflammation, and improve heart, vascular, digestive, and kidney health.

Thyme herb & essential oils (*Thymus vulgaris*)

Used for immune boosting as well as broad-spectrum infection treatment and prevention, reducing blood pressure, and natural insect repellent.

Savory (*Satureia Montana*)

Another common cooking herb, savory is used to aid digestion, and treatment of various digestive problems including colic, diarrhea, and gas. Savory is also used as a mild antiseptic and provides relief from bee and wasp stings.

Lavender (*Lavandula angustifolia*)

This commonly used herb has been used as a powerful antiseptic, treatment of burns, and relaxant for both mind and body.
