

Restorative Boost

What is Ozone?

Ozone is a gas made up of three oxygen atoms (O₃). It occurs naturally in small (trace) amounts in the upper atmosphere. Ozone protects life on Earth from the Sun's ultraviolet (UV) radiation! Medically, it is used to help increase the amount of oxygen in your body to replace/repair damaged cells.

Restorative Boost

Proprietary Blend of Nutrients & Ozone.

Our tissue repairing injections *contain our proprietary blend of nutrients plus ozone, or can contain only ozone*. These injections are **ultrasound guided** to placed deep into joint spaces to **promote health tissue and regenerate cartilage**. The proprietary blend consists of multiple amino acids, B12 and procaine. The addition of ozone to these injections provides **high amounts of oxygen to the joint spaces**, *which are typically low-oxygenated areas*. Patients can see **improvements** from joint pain within the **first several injections**. This can offer the ability to withhold from surgical intervention and *does not have any negative side effects, unlike steroid injections*.

Simple

Proprietary Blend including Ozone.

Ideal for: Knee, Shoulder, Elbow, Ganglion Cysts,
Trigger Finger, Etc.

Complex

Proprietary Blend including Ozone.

Ideal for: Neck, Lower Back, Hips, Spine, Etc.

Boost with PEMF

Pulsed Electromagnetic Field Therapy (PEMF) *creates micro-currents inside of tissues triggering a domino effect of biological processes to aid damaged tissue.*

1 Injection Every
2 Weeks for 3 Weeks

1 Follow Up Injection
4 Weeks Later

Every 3-12 Months as
Needed

Pain & PEMF

What is PEMF?

Pulsed ElectroMagnetic Field Therapy (PEMF) creates micro-currents inside of tissues triggering a domino effect of biological processes to aid damaged tissue, like recharging your cells' batteries. Sitting in the PEMF chair for 30 minutes or less can energize the natural healing power within each cell of the body, resulting in tremendous benefits.

Boost with PEMF

Combine Regenerative Boost Injections or Prolozone Injections with PEMF and maximize your results.

Suggested Schedules

PEMF is Recommended After All Injections

Simple & Complex

1 Injection Every 2
Weeks for 3 Weeks

1 Follow Up Injection 4
Weeks Later

Every 3-12 Months as
Needed

Prolozone

1 Injection Every 2
Weeks for 3 Weeks

1 Injection 1/Month for 3 Months

1 Injection Every 6 Months
as Needed
