The ingredients in this product are supplied by a well-respected USA and/or European vendors, and they are HPLA analyzed for purity and quality. These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure, or prevent any disease.

This Formula Includes:

Saccharomyces boulardii (3 Billion CFU)

Saccharomyces boulardii is a probiotic yeast often used for the treatment of GI tract disorders such as diarrhea symptoms and C. difficile.

Probiotics are live organisms and when administered in adequate amounts, provide a health benefit to the host, independently of where the action takes place and of the type of administration. They are normally recommended to help strengthen host systems, for example the gastrointestinal (GI) tract, and assist in the recovery of certain diseases.

Can be found naturally in fruits such as mangosteen and lychee.
