

Prolozone

What is Prolozone?

This homeopathic/oxygen injection technique for treating all forms of musculoskeletal and joint pain including: **chronic back pain, rotator cuff injuries, degenerative and arthritic hips and knees, degenerated discs, and shoulder and elbow pain.** The good thing about Prolozone is that because it **corrects the pathology of the disorder**, *there is a 75% chance for the chronic pain sufferer to becoming permanently pain-free.*

Conditions Prolozone Can Help Treat:

Sciatica	Lower Back Pain	Scar Tissue	Knee Injuries
Heel Spurs	Plantar Fasciitis	Neuromas	Rotator Cuff Tears
Tennis Elbow	Carpal Tunnel Syndrome	Torn Tendons	Lipomas

How it Works

The reason that some injuries completely heal and others don't, has to do with circulation. In order for a damaged area of the body to regenerate and heal, it must have the critical elements that only the blood can provide: **vitamins, minerals, and oxygen.** Of these, by far the most important is oxygen. Low levels of oxygen cause an accumulation of lactic acid, which is what causes pain. **Prolozone works in three ways.** **First**, *homeopathic anti-inflammatory medications like dextrose and procaine are injected into the area to reduce inflammation and swelling.* **Next**, *the area is treated with vitamins and minerals that are critical for healing.* **Finally**, *the area is infiltrated with oxygen in the form of ozone.* The result is that the tissues get what they need to heal. As they heal, the circulation to the area is re-established, and the treatment is complete.

Treatment varies from person to person, but **most people only need from 3-5 treatments.**

Injection Schedule

1 Injection Every 2 Weeks for
3 Weeks

1 Injection 1/Month for 3 Months

1 Injection Every 6 Months as
Needed
