

ACOUSTIC LIGHT WAVE

HEALING WITH ELECTROMEDICINE

Brief History of the Acoustic Light Wave:

Electromedicine, which is widely used in Europe, is less known and employed in the United States despite its known and proposed therapeutic effects. It has come under unfair scrutiny due to its ability to destabilize modern medicine and provide an inexpensive treatment in comparison to modern techniques and toxic drugs.

Dr. Royal Raymond Rife developed the first “Rife Ray” (the “Rife Ray” is what modern Acoustic Light Wave machines are based off of) in the early to mid 1900’s and employed it in his medical practices. His research showed that his treatments were effective in devitalizing pathogens and diseased organisms. The original “Rife Ray” was lost, however, using modern technology, the ray has been revitalized and we are now realizing the broad and amazing applications this technology brings to the medical field.

How Does the Acoustic Light Wave Work?

The Acoustic Light Wave works by employing high frequency waves to break down cell walls in pathogens and disease organisms. Effectively targeting these organisms requires knowledge of the organisms specific MOR (or Mortal Oscillatory Rate). The mortal oscillatory rate is described as the rate at which said organism resonates (or vibrates). The atoms and molecules that make up our world are constantly in motion (vibrating) and the same is true for pathogens and disease causing organisms. So by matching frequency of said organisms we can theoretically break down and devitalize them, effectively eradicating most if not all of the targeted organisms.

Simply put, the treatment can be compared to an opera singer shattering crystal glass by singing at a certain frequency. The glass, which is vibrating at a certain frequency will shatter similar to the way the organism shatters.

Benefits of the Acoustic Light Wave:

- Are Non-invasive.
- Support the body’s innate ability to heal rather than bypassing it’s natural functions.
- Are fairly easy to use.
- Can be utilized over the course of a lifetime to treat many conditions.
- Are relatively inexpensive considering their range and scope.

Some of the Conditions Acoustic Light Wave May Help:

- Lyme Disease
- Necrotizing Fasciitis
- Atherosclerosis
- Mumps
- Common Cold
- Bacillus Coli Virus
- Can target various Microbes
- Can target Bacterial Infections
- Can target Viral Infections

How Many Treatments Will I Need?

The number of frequencies you use per session, the time allotted for each frequency, the duration of sessions, and the number of sessions you give yourself daily or weekly all depend on your condition, the amount of cellular die-off in your system, and your own unique situation. Seek advice from your health care practitioner.

Other Idaho Falls Providers:

Other local providers who use Acoustic Light Wave technology have found that after the minimum of five sessions change can be noticed.

Clinics in the area may have shown a reduction in symptoms of the following:

- Symptoms of the Common Cold
- Bladder/Urogenital Discomfort
- Sinus Issues
- Virus/Bacteria
- Epstein Barr Virus
- Lyme Disease

This list, although small, is not an all inclusive list of the wide range of conditions ALW (Acoustic Light Wave) can potentially treat. Due to its proposed effectiveness against microbes, viruses, and bacteria, the list of ailments that may benefit from ALW therapy is incredibly large. The ALW lets us program 300+ frequencies indications which can be selected for the exact indication desired by you.

This amazing technology, which was previously lost to time, is available now at the Healing Sanctuary in conjunction with our revolutionary Mild Hyperbaric Oxygen Therapy. Schedule an appointment today with your health care provider to discuss the amazing benefits ALW may bring to your life.
