

# FemEase

## Clinical Applications

- Alleviates menopausal symptoms: hot flashes, night sweats, etc.
- Aids immune system
- Natural alternative to estrogen therapy
- Reduces PMS & menstrual cramps

## Discussion

Sage (*Salvia Officinalis*) has had a long standing history of treating everything from strains and sprains, sore throats and coughs, strengthening the nervous system, improving memory, and treating excessive menstrual bleeding. Sage is specifically blended in FemEase for its anti-inflammatory and antiseptic/antibacterial properties, its ability to relieve pain and tension, and largely for its ability to relieve menopausal symptoms.

Traditionally, sarsaparilla fruit has been blended as a drink with a lovely rootbeer flavor, and consumed for its sundry of healing properties as early as the 16<sup>th</sup> century. In FemEase, sarsaparilla root extract has been added to aid the immune system by countering infectious microbes, reducing inflammation, and decreasing the body's toxic load. Sarsaparilla also plays an important role in supporting the liver, which is imperative for overall wellness, filtering toxins, storing nutrients, and producing hormones and digestive substances.

The remaining oils and extracts in FemEase were chosen for their exceptional vitamins and minerals, extraordinary hormone-balancing abilities (alfalfa and wild yam being chemically similar to estrogen), calming effects, and means of easing menstrual cramps and PMS.

**Supplement Facts:**

Serving Size: 1 capsule

Servings Per Container: 60

**Amount Per Serving****% Daily Values**
