

PhytoFlex

Clinical Applications

- Promotes optimal joint health
- Lubricates joints
- Relieves & prevents joint pain
- Improves joint mobility
- Speeds up recovery of musculoskeletal injury & surgery

Discussion

PhytoFlex and PhytoFlex Extra are specially formulated to maximize joint health by harnessing the benefits from all-natural glucosamine sulfate, MSM (methylsulfonylmethane), chondroitin sulfate (in PhytoFlex Extra), and yucca root extract. When combined, these ingredients have the power to promote wound healing of joints, and improve joint lubrication for pain-free movement.

Found naturally within joint cartilage, glucosamine has powerful anti-inflammatory, anti-aging, and cartilage building properties, making it wonderful for relieving disorders like arthritis and chronic back pain. Besides being a protector of the musculoskeletal system, glucosamine also improves digestive health, eases inflammatory bowel disease and leaky gut, relieves TMJ symptoms, and alleviates bone pain.

Chondroitin is an important structural component of cartilage key in allowing joints to withstand pressure. Its ability to build and rebuild connective tissue throughout the body makes it a perfect pair with glucosamine in PhytoFlex Extra to heal injuries, recover from surgery, and naturally relieve pain in the long-run.

Supplement Facts:

PhytoFlex: Serving Size: 1 capsule
PhytoFlex Extra: Serving Size 4 capsules

Servings Per Container: 100
Servings Per Container: 30

Amount Per Serving	% Daily Values
Glucosamine sulfate..... 500 mg	*
